

# A Getting Started Package for ACTIVATE Data Visualization

By Joseph Schlosser ([jsschlosser@email.arizona.edu](mailto:jsschlosser@email.arizona.edu)), University of Arizona

- 1) Go to: <https://mybinder.org/>
  - 2) Enter the GitHub repository URL  
[https://github.com/jsschlosser/ACTIVATE\\_DataWorkshop](https://github.com/jsschlosser/ACTIVATE_DataWorkshop)
  - 3) Enter “main” for the Git ref
  - 4) Hit launch
  - 5) Open “PlottingCode.ipynb”
  - 6) Restart the kernel and rerun the whole notebook
  - 7) Scroll down, select the bottom cell, and hit run to get image to plot in-line.
  - 8) Any of the three data files in the binder can be selected by changing the filename.
  - 9) New x- and y-axis variables can be selected by changing the values of  $xi$  and  $yi$ , respectively
    - The  $df2$  variable can be used to determine columns of interest
